EDUCATION

Iowa State University   **Expected: 05/2026**
Bachelor of Science in Software Engineering   *Ames, Iowa*

Iowa State University   **Expected: 05/2026**
Bachelor of Arts in Philosophy   *Ames, Iowa*
GPA: 3.56
Relevant Coursework: Object-oriented Programming, Discrete Mathematics, Data Structures & Algorithms, Software Development Practices, Computer Architecture, Database Management Systems, Probability and Statistics, Software Testing, Advanced Programming Techniques, Computation Theory, Software Architecture and Design, Algorithm Design and Analysis

EXPERIENCE

CyLife | *Java, Spring Boot, MySQL, JavaScript, HTML/CSS, Android Studio, Git*   08/2024 – 12/2024
- Led backend development for a full-stack Android application, utilizing Spring Boot for API development, Android Studio for mobile integration, and MySQL for relational data storage, centralizing student clubs and organizations into one cohesive platform
- Designed and implemented WebSocket-based real-time chat and notification systems, enabling instant communication between club members and providing real-time event updates
- Developed and optimized MySQL database schema with efficient indexing and entity relationships, ensuring scalable and high-performance data management for users, clubs, and events

Dungeon Crawler - Questvein | *C++, C, Lex, Yacc, Git*   1/2025 – Current
- Designed and implemented algorithms such as Perlin Noise for procedural terrain generation and Dijkstra's Algorithm for dynamic pathfinding, utilizing Fibonacci Heaps to optimize performance for large-scale environments
- Developed a custom file I/O system to save and load dungeon states in a binary format, ensuring data integrity with big-endian conversions and error handling
- Constructed a custom parser using Lex and Yacc to process game entities, enabling dynamic level configurations and player interactions
- Employed modular programming principles with separate compilation units, leveraging header files and a Makefile, for maintainability and scalability

Home Haven | *JavaScript, React.js, Node.js, Express.js, MongoDB* | *(MERN)*   10/2024 – 12/2024
- Developed a RESTful API using Express.js and MongoDB, enabling secure user authentication, trip bookings, and data retrieval for seamless frontend integration
- Created a responsive and user-friendly frontend for Home Haven using the MERN stack, integrating MongoDB, Express, and Node.js to create seamless interactions with backend services
- Designed and implemented scalable user management, including account creation, updates, and deletions, ensuring efficient data handling and secure transactions
- Directed an intuitive and user-friendly interface with React state management and hooks, ensuring smooth navigation and interactivity

TECHNICAL SKILLS

Languages: C++, C, Java, Python, JavaScript, Kotlin, HTML/CSS, Assembly
Frameworks/Tools: Git, React.js, Node.js, Express.js, Lex, Yacc, MySQL, MongoDB, Neo4j, Spring/Spring boot, Android Studio

CLUBS AND ACTIVITIES

Ames Collegiate Chess Club, Iowa State University   10/2022 – Present
Computer Science and Software Engineering Club (CSE), Iowa State University   01/2023 – Present
Birding Club, Iowa State University   08/2023 – Present
Mountaineering and Climbing Club, Iowa State University   08/2023 – Present
